we can't live against evolution. We have left the water. We are land dependent. We are on land faster than in water. It is Land on which we can eat cook, fry steaks. We can sleep here. Can we sleep in the water?

We can not turn back the evolutionary steps .

We live in a time in which one wants to ban us to live in accordance with the evolution.
If it continues we are going to loose all achievements of humanity..

You're saying. Closer, please.

There are enemies of evolution -postcommunists- trying to create extinction of civilization as we know.

The many shootings are only a symptom. It goes much deeper than violence.

Lets start

We need air to breathe. We are no plants. We can be ambivalent. We take care of our animals. They shall be healthy. Then we kill them. We can butcher them. We want nothing to do with the killing of animals. But someone must slaughter them. A cattle will not get by itself to burger.

Let's visit a young man of stone age . He was stronger than the woman. He never gets pregnant. He was stronger.

He was hunting to eat. There was no law. If someone wanted to take it away, he struck him dead.

eventually, he sees a young woman on the river. She likes him. She laughs. He notes that emotions are missing him. The woman brings emotions. He wants to fuck her also. He is ambivalent too. He knows she has parents.

If he now fucks her, they kill him. She helps her parents. She can not live alone.

He brings to parents hunted animals. The parents like him.

He is not talking. There is no language at all.

After a short time he takes her into his cave. He fucks her.

He has not denied his needs. He took advantage of his ambivalence. Not more.

She has also interests. She is also ambivalent. Food and power.

She knows that from now on she will get larger meat pieces from her husband as at home with the parents.

She also has power. With her emotions she has much power about him.

1000 years k/ater they talk. She can talk much more about private life. Again she has more power.

When he is hunting less , she has a sad impression of face. Then he struggles more. He improved his hunting weapons.

Although she is weaker physically, her emotions gave her power. The children are also more connected to the mother. Again she improves her position of power.

E94830255E E94830254E E94830256E

He has power too. The woman is like private property for him. He is now more powerful.
If another man would touch her, he will kill him.
he fucks her when he feels like. after meal they lay down. He feels her close. He feels her body. His
cock is hard. He fucks her.

For a man is eating as important as fucking his wife/girlfriend. Nothing has changed.

We can not defeat the evolution. We may be ambivalent.
Thinking back to the first stone age people. They were no animals anymore. They were ambivalent.

What about 21st century
Post Communism is about to take over US. Politically, communism has not won. But now the
communism wants to take over our society. In new york as in san francisco. In baltimore like in chicago.

We not even take notice..
A Trojan horse.
Imagine 2 actors. We call them Mr. and Mrs. jones.

There are good actors. Very good actors
a new movie
She is a thief. She steals jewels from rich actors at Nice. She wears a catsuit.
He is a french inspector. He has a gun in the coat. Driving a police car

These actors are cheering of the equality of all people, all relations.
Suddenly, she appears in the coat and is wearing a sheriff's badge. The Director is appalled.
Nobody will pay for this movie. Absurd. She agrees.
The next day he wears a catsuit. The production is stopped.
No movie. No sales. Many get unemployed. Why? Actors wanted to be equal.
The end of movies.

We do the same at the moment.
We say men and women are equal in the marriage/close friendship
But there is nothing more unequal on planet earth than a male/woman relationship.
He has a cock and puts it in her body. Is this equality.

We have to play this evolutionary play again.
Its fun for both. It gives us power. Its more interesting then to play a male/female relation as it would
be a joint venture of companies.

Both want to have power and have fun. But man and woman have to reach these goals in different
ways

E94830255E E94830254E E94830256E

Today a man must afraid when he fucks his wife.

Was it against their will. When he thinks about his erection is gone.

Many men are afraid of relations. They know: You can talk to your girl-friend. But you cannot fuck her. But men have a sexuality. Sex is love and aggression.

Men cannot get rid of aggression. It is evolution.

A very very very hard question

how many amok shooter in recent years had girlfriends and had sex.

Nowadays men having evolutionary husband-wife sex relation must be in fear to come to prison like a robber.

Dangerous to be a man nowadays-

men are not even allowed to fuck

it is one of the most simple things in a relation

but now

if wife gets divorced, suddenly all fuckings could change to a rapture.

Fucking is getting to be the highest risk in life for a man.

Good bye land of freedom-

We need a written contract for a man/woman relation saying both agree to play this evolutionary play.

Like in football. You cant go to police if you get hurt
private life of husband and wife is like a football play.
